

# Personal Expense Analytics Project

## GitHub Ready Python Project

This project analyzes personal expenses using Python, Pandas, and Matplotlib. It loads expense data from a CSV file, generates category-wise summaries, and creates simple visualizations.

## Project Structure

Personal\_Expense\_Analytics/

■■■ app.py

■■■ requirements.txt

■■■ README.md

■■■ data/expenses.csv

## Features

- Load expense data from CSV
- Category-wise expense analysis
- Expense visualization using bar charts
- Easy GitHub deployment

## Requirements

pandas, matplotlib

## Sample app.py Logic

Read CSV data, group expenses by category, print totals, and generate a bar chart.
